Hi matthew,

Welcome to Stable! Our team is so excited to have you here. 💌

Stable is designed to make managing your mail easier, and getting started is a quick and easy process.

Here is your new Stable address:

matthew pursley
390 NE 191st St
#91863
Miami, FL 33179

Before you start using your address, here are a few first steps:

1. If you haven't already, grant Stable permission to receive and handle mail for you by filling out the mail authorization forms. You'll see this on the homepage underneath **Authorize Your Address**.

   We'll keep this on file so that USPS knows that you authorized us to receive your mail for you. Only one form is needed per address. More information here.

2. Start using your address — use your address with new vendors and entities like the IRS, or start forwarding your mail to Stable from another address.

   Important: *Make sure to always use your Stable unit number **(#91863)** — it can be formatted with Unit, STE, Suite, or #.*

3. Finally, wait for your first piece of mail to come in!

Here's what to expect when your mail comes in:

- You'll get a notification from mailroom@email.usestable.com telling you that you have mail.
- In the email, you will see a scanned copy of the front of the envelope. From there, choose **Scan** for us to open and scan the inside, or **Forward** for us to ship it to a different location. Automatic scanning can be also be turned on underneath **Automations.**
- We hold all physical mail for 30 days before it is securely shredded. All digital copies (scans) will be available forever.

- We can accept and scan most mail as long as it aligns with our Fair Use policy (note: no food or perishables).

Finally — we are excited that you're here and can't wait for you to get started! If you have any questions, we have FAQs here in our support center, or feel free to email us anytime at priority@usestable.com.

With all of our best,

The Team at Stable

P.S — If you have any friends that could also use a virtual address or mailroom, you can find your own custom referral link under the "Refer & Earn" section of your Stable Dashboard, where you can earn $100+ for each referral you make.
