HUNGER.

THE BRAND THE DIET INDUSTRY *doesn't see coming.*

An apparel-led brand and a holistic fitness app, built for the generation that grew up watching the diet industry lie — and decided to defect.

YOUR DIET APP LIED TO YOU.

— THE PROBLEM

THE LIE.

Three of them, actually.

Every diet app sells the same three things in different colors. The contract is identical — quantify yourself, hate what you find, pay us to keep doing it. We grew up watching it lie to our mothers.

— LIE · 01

~~A smaller body~~ is a better body.

The bathroom scale has been sold as a moral instrument for fifty years. We raised a generation that confuses gravity with worth.

— LIE · 02

~~Discipline~~ looks like a deficit.

The deficit is not discipline. The deficit is debt. A body that owes you energy will collect — through cravings, crashes, and the binge.

— LIE · 03

~~Tracking~~ is the same as caring.

Tracking your body is surveillance, not a relationship. A body knows things. An app that tells it what to think taught it not to listen.

— THE MARKET WE PICKED THE FIGHT IN

TOLERATED.

Not loved.

100M+ installs split across four incumbents — and not one defensible brand. They speak to nobody under 28 in a voice that resembles how that audience actually talks.

MyFitnessPal	200M+ INSTALLS	INSTALL-BASE LEADER. 2014 SAAS UI.
Noom	$400M+ ARR	SPEND LEADER. BUILT FOR 45+ LOSING WEIGHT.
WW (Weight Watchers)	~3M SUBS	AGING ICP. THE BRAND IS THE PROBLEM.
MacroFactor	~250K SUBS	BELOVED BY PHYSIQUE NERDS. NARROW.
HUNGER.	— 2026	THE FIRST ONE WITH A WORLDVIEW.

"CATEGORY LEADER" GOT CONFUSED WITH "CATEGORY DEFAULT." TOLERATED IS THE MOST BEATABLE POSITION IN CONSUMER SOFTWARE.

— WHY THIS IS A 2026 BRAND

THREE WAVES.

One moment.

— WAVE · 01

THE ANTI-DIET *defection.*

"Diet" is now an embarrassing word — the way "fat-free" was in 2010. Gen Z's relationship with the diet industry is inherited grievance, not active belief.

— #INTUITIVEEATING · ~4.2B VIEWS ON TIKTOK

— WAVE · 02

GLP-1S *broke the promise.*

Ozempic shattered the diet industry's central claim — that willpower-based restriction is the path. Half the market left. The other half needs a non-restriction philosophy that doesn't exist yet.

— OZEMPIC RX · +550% IN 3 YEARS

— WAVE · 03

THE CREATOR *arbitrage.*

A deep bench of mid-tier fitness creators (50K–500K) is now expensive for incumbents and cheap for us. There's a 1–2 year window before rates re-set.

— WINDOW CLOSES · ~Q3 2027

Honestly: directionally right, not metaphysically certain. We build to survive a 12-month delay in the cultural slope and still have a brand.

— THE THESIS, IN ONE SENTENCE

YOU ARE *not a number.* YOU ARE A BODY THAT *knows things.* WE BUILT A BRAND THAT *listens.*

— WHAT WE ACTUALLY MEASURE

HEALTH IS MORE THAN A METRIC.

The daily check-in is five things, in bands, not numbers. The signal isn't any one of them — it's the relationship between them. A body talking, if you let it.

BANDS · NO SCORE · NO WEIGHT · ~20S DAILY CHECK-IN

— THE NUMBERS, HONESTLY

Calories, macros, weight — they still exist in the app. *Off by default, in a drawer, and the toggle tells the truth about why it's off.* HUNGER isn't a calorie tracker; it just doesn't pretend numbers don't exist for the people who want them.

FIG · THE AI COACH

— THE RETENTION ENGINE

NOT A GPT WRAPPER. A COACH WITH A *position.*

01 — IT KNOWS HER CHECK-INS

Context, not a cold prompt box.

It remembers the week. A generic chatbot starts from zero every time.

02 — IT HAS A SPINE

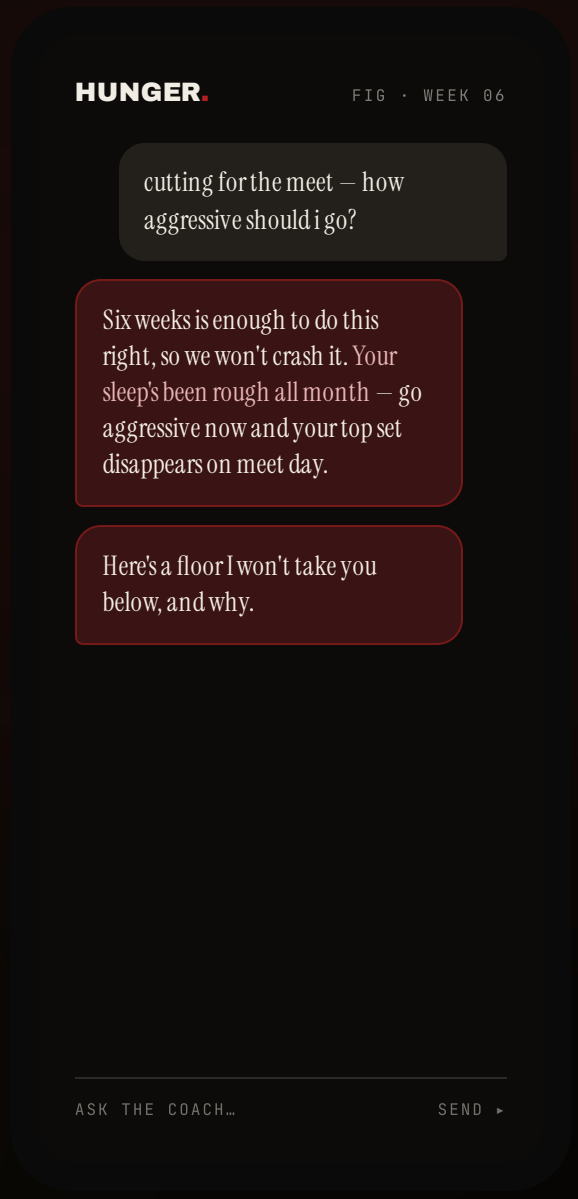

A worldview, and the nerve to push back.

When sleep's been rough and she wants to crash-cut, it tells her to eat the sandwich.

03 — IT REFUSES

It won't coach below intake floors.

The safety rail is a feature, not fine print. Incumbents can't follow — their model rewards intake-comparison.

"IT KNOWS HER CHECK-INS, AND IT HAS A SPINE. A CHATBOT HAS NEITHER."

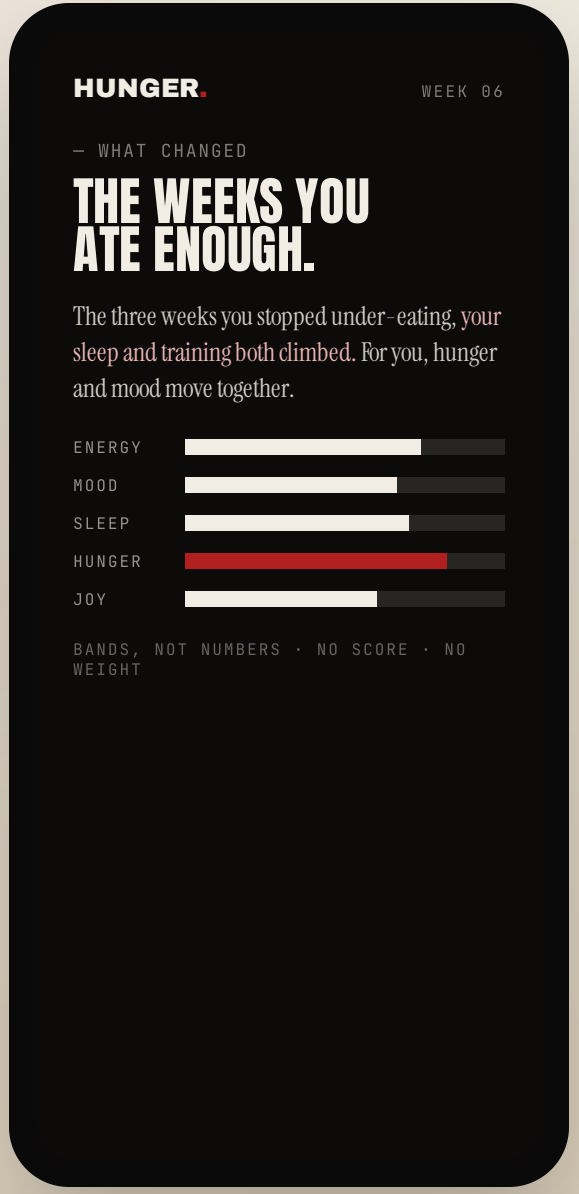

— ANALYTICS THAT COUNT SOMETHING ELSE

THE PATTERN.

Every other app counts calories. Ours finds relationships — the way your sleep and your training move with what you ate. Analytics in service of listening, not surveillance.

— WHAT IT SURFACES

"The three weeks you stopped under-eating, your sleep and your training both climbed. *For you, hunger and mood move together — that's your body talking.*"

— A BODY AND A FACE

TWO PRODUCTS.

One fight.

— PRODUCT · 01 · APPAREL

The shirt.

The thesis you wear on your back. A 14oz heavyweight hoodie and a 6.5oz tee — dark and light colorway, one blood-red period. The shirt is the cheapest paid ad in marketing.

BETA · 2026 · 2 GARMENTS · 4 PRINT DESIGNS
COLORWAY · DARK & LIGHT · BOTH UNISEX
ROLE · EARNS THE AUDIENCE

— PRODUCT · 02 · SOFTWARE

The app.

A holistic check-in you open every morning to ask the question. Five bands, no shame, an AI coach with a spine. The app is the retention engine.

FORM · IOS FIRST · ~20S DAILY CHECK-IN
TRACKS · ENERGY · MOOD · SLEEP · HUNGER · JOY
NUMBERS · OFF BY DEFAULT · OPT-IN DRAWER

THE SHIRT EARNS THE AUDIENCE. THE APP KEEPS THEM.

— WHO WE WROTE EVERYTHING FOR

THE READER.

Women 18–28 · the loud quarter.

If it lands for her, it lands wider. Design it for everyone and it lands for no one. Three operating fictions — the people every screen, shirt, and TikTok is written for.

Sara.

the defector

22 · AUSTIN · LIFTS 4×/WEEK

"I want to be strong, not small. I'm angry about being in that contradiction, and looking for permission to resolve it."

— CREATES THE ORGANIC PRESS

Devin.

the serious one

19 · BOULDER · CLUB SPORT ATHLETE

"Diet apps are for my mom. I want something that reads as a training app — a coach that answers my questions about cutting for a tournament."

— FOUND VIA A SINGLE 30-SEC TIKTOK

Maya.

the recovering tracker

26 · BROOKLYN · DESIGN / MEDIA

"I miss the data shamefully — like an ex who was bad for me. I'll write the Substack about you. I'll also turn on you hardest if you drift."

— THE COHORT THAT MAKES PRESS

— COMMITMENTS WE ARE BUILDING TOWARD, AND INVITING CLINICIANS TO OWN

THE ETHICS MOAT.

The structural reason the incumbents can't follow — their business models reward intake-comparison engagement. Ours doesn't. These are commitments, not a board we already have.

01 **Intake floors.** Refuses to coach below medically reasonable floors (~1,200 kcal women / ~1,500 men) — set and adjusted by a registered dietitian.

02 **Under-fueling alerts.** After consecutive days below maintenance — named, not shamed.

03 **Numbers off by default.** Calorie display off by default; an honest toggle that's truthful about why it's off.

04 **Help, two taps away.** The National Alliance for Eating Disorders helpline reachable from any screen.

05 **No before-and-afters. Ever.** No body-mass-based marketing. Age rating 17+. No in-app comparison feed.

06 **Money where the mouth is.** A committed share of subscription revenue to an ED-recovery nonprofit, disclosed publicly.

THE BRAND IS THE *rebellion.* THE PRODUCT IS THE *responsible adult* UNDERNEATH.

— FOUR THINGS THEY CAN'T COPY

01 — THE MEASURE

Five signals a day. **Not one of them is a number.**

02 — THE COACH

FIG has a spine. **It refuses to coach you into the ground.**

03 — THE NUMBERS

The metrics live in the app — **off by default, on purpose.**

04 — THE MOAT

Community without comparison. **No feed, no leaderboard, ever.**

HUNGER.

EAT ENOUGH.

The brand is the rebellion. The product is the responsible adult underneath. The shirt earns the audience. The app keeps them.
