SEAN KELLER

Lead Full-Stack Engineer | AI & Fintech Systems | Scalable Architecture | Startup Engineering Leadership

seankeller.dev@gmail.com https://github.com/KobenjiSan?tab=repositories Hoboken,New Jersey

SUMMARY

I am a Senior **Full-Stack Engineer** with extensive experience building scalable platforms across ***frontend***, ***backend***, **and** ***cloud*** **infrastructure**. Proven track record of architecting **secure** ***financial*** **systems**, developing ***AI*****-powered applications**, and leading engineering teams in **startup and high-growth environments**. Skilled in translating complex business requirements into **production-ready software solutions**, implementing **scalable system architectures**, and driving innovation through **Generative *AI*, automation, and data-driven platforms**. Passionate about building high-impact products, mentoring engineering teams, and establishing strong technical foundations for long-term organizational growth.

SKILLS

Python **JavaScript** **TypeScript** **React.js** **Next.js**

Node.js **Django** **FastAPI** **REST APIs** **GraphQL**

PostgreSQL **MongoDB** **Redis** **System Architecture**

Microservices Architecture **Cloud Infrastructure (AWS)**

Docker **Kubernetes** **CI/CD Pipelines** **Git**

Generative AI **Large Language Models (LLMs)** **AI Agents**

Prompt Engineering **Retrieval Augmented Generation (RAG)**

Vector Databases **Data Security & Compliance**

Scalable Distributed Systems **Technical Leadership**

Engineering Team Management

PROFESSIONAL EXPERIENCE

Lead Full Stack Engineer

Clarity — 06/2024 - Present

- Architected scalable full-stack platforms supporting high-volume financial and operational workflows.
- Designed secure backend architectures using Python, Node.js, and PostgreSQL for data integrity and performance.
- Led development of AI-powered automation systems integrating LLMs and intelligent workflows.
- Established engineering standards, CI/CD pipelines, and code review processes to improve development efficiency.
- Collaborated with product leadership to translate business requirements into scalable technical solutions.
- Mentored engineers and guided architectural decisions across frontend, backend, and infrastructure systems.

PROJECTS

AI-Powered Financial Operations Platform

- Designed and developed a full-stack fintech platform to automate fund operations, reporting, and financial workflows for investment management teams.
- Built scalable backend services using Python and Node.js with PostgreSQL to manage sensitive financial data with strong auditability.
- Implemented Generative AI features using LLMs to automate financial analysis, document processing, and operational insights.
- Deployed containerized services using Docker and cloud infrastructure to ensure secure and scalable platform performance.

Investment Data Intelligence System

- Built a data analytics platform that aggregates and processes large volumes of financial and operational data for investment firms.
- Developed REST APIs and microservices architecture to support real-time reporting and financial data integrations.
- Implemented AI-driven insights and predictive analytics models to identify trends and improve decision-making.
- Optimized database queries and distributed processing pipelines to handle high-volume enterprise datasets.

AI Workflow Automation Platform

- Developed an AI-powered automation system that integrates LLMs and intelligent agents to automate repetitive business operations.
- Built scalable backend orchestration services using Python, FastAPI, and message-based processing pipelines.
- Implemented Retrieval-Augmented Generation (RAG) with vector databases to enable contextual enterprise knowledge retrieval.
- Designed dashboard interfaces with React and Next.js to monitor workflows, automation tasks, and system performance.

Geospatial Intelligence & Mapping Service

- Developed a Python geospatial processing service capable of analyzing large geographic datasets for location-based insights.
- Integrated mapping layers and spatial queries using PostGIS and geospatial indexing for efficient route analysis.
- Built APIs that enabled client applications to visualize spatial data and perform geographic analysis dynamically.

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer

Yorcreative — 08/2022 - 05/2024

- Developed high-performance applications using React, Next.js, and modern JavaScript frameworks.
- Built secure RESTful APIs and microservices for enterprise-grade software platforms.
- Implemented cloud infrastructure solutions using AWS and containerized deployments with Docker.
- Optimized system performance by redesigning database schemas and backend processing pipelines.
- Integrated AI-driven features including recommendation engines and intelligent automation workflows.
- Worked closely with cross-functional teams to deliver high-quality scalable products.

Full Stack Software Engineer

RE/Max — 01/2021 - 08/2022

- Built and maintained backend components using Python and Django,
- Built end-to-end web applications using React, Node.js, and PostgreSQL.
- Designed scalable APIs and data services supporting complex business workflows.
- Implemented authentication, security protocols, and role-based access systems for enterprise applications.
- Improved system performance through code optimization and infrastructure enhancements.
- Collaborated with product and design teams to deliver user-focused software solutions.
- Participated in system architecture planning and technology selection.

Associate Software Engineer

SocialMgr — 12/2018 - 2020

- Developed and maintained web applications and backend services using modern development frameworks.
- Created dynamic user interfaces and responsive web experiences using JavaScript and frontend frameworks.
- Integrated database systems and third-party APIs to enhance application functionality.
- Assisted in implementing automation tools and deployment workflows.
- Debugged complex issues and improved system reliability and performance.
- Contributed to collaborative development in agile engineering environments.

EDUCATION

Masters in Information Technology

DeVry University
